

GLASS SECURITY DESK SCREEN

Protective screen made of 5 mm high resistance tempered glass, in case of breakage it does not atomize into small pieces like conventional glass. Specially designed for division and protection against possible contagion. Its design and hardness make it perfect for the hygienic separation of public places; such as boutiques, restaurants, notaries, etc., as well as for shops with attention to the public, since their design allows the flow of money or documents from both sides. Made of glass, it offers unmatched visibility, great scratch resistance and therefore high durability in good conditions; its hygiene and ease of cleaning is one of its strong points.
