

## PREMIUM PROTECTION SCREEN

Protective screen made of high strength tempered glass 6 mm and high quality design non-slip metal supports. For its composition this glass is impact resistant, in case of atomized break in small pieces so as not to cause harm to people as opposed to conventional glass. It is designed for division and protection against possible contagions. Its design and hardness make it perfect for separation hygienic public places; such as offices, boutiques, restaurants, etc., as well as for businesses with attention to the public, as their design allows money or documents to be drawn from both sides. Built in high quality glass offers unmatched visibility, great resistance to and therefore high durability in good condition; their hygiene and ease of cleaning is one of its strong points.

Delivery time approx. 48 h.
